PROFILE

A motivated Computer Science and Engineering undergraduate at the University of Moratuwa with a strong academic foundation in physical sciences and a proven ability to work effectively in team-based software development projects. Eager to apply technical skills and problem-solving abilities in a challenging professional environment.

ACADEMIC QUALIFICATIONS

University of Moratuwa 2024 – Present

Bachelor of Science in Computer Science and Engineering (1st Year)

Key areas: Programming, Data Structures, Software Engineering, Computer Systems

Govt. Science College, Matale 2019 – 2023

- GCE Advanced Level – 3As in Physical Science Stream
- GCE Ordinary Level – 9As

Ovilikanda Maha Vidyalaya, Matale 2010 – 2018

WORK EXPERIENCE

Engineering Intern – Planning 2024 (4 months)

DSP Controls (Pvt) Ltd, Sri Lanka | [dspcontrols.lk](#)

- Worked as part of an engineering team on multiple projects across the company's portfolio
- Contributed to project planning, design coordination, and the preparation of ducting layout plans
- Gained hands-on exposure to engineering workflows, technical drawings, and cross-functional team collaboration

Trainee – Banking Operations 2024 (6 months)

People's Bank, Matale Branch

- Assisted with day-to-day banking operations and customer-facing transactions at the Matale branch
- Gained practical exposure to financial record-keeping, data management, and customer service workflows
- Developed strong attention to detail and organizational skills in a professional work environment

PROJECTS

UniMed: Voice-Enabled Digital Medical Record System 2026

Group Project – MORASHIFT | University of Moratuwa

- Developed a web-based system to digitize and manage student medical records at the University Medical Center, replacing a manual paper-based filing system
- Implemented a Voice-to-Text interface enabling doctors to record diagnoses and prescriptions verbally, with manual correction capability
- Designed a centralized database for secure storage and instant retrieval of student medical history via Index Number

Technologies: HTML/CSS, JavaScript, MySQL **Team size:** 5

Nanoprocessor Design – 4-bit Custom Processor 2026

Group Project – University of Moratuwa

- Designed and implemented a 4-bit nanoprocessor in VHDL capable of executing a custom instruction set (MOVI, ADD, NEG, JZR)

Technologies: VHDL, Vivado, BASYS 3 FPGA **Team size:** 4

Smart Dustbin – IoT Waste Management System

2025

Group Project – University of Moratuwa

- Proposed and designed a smart waste management system for both public (bus halt) and industrial (hotel/kitchen) use cases
- Incorporated ultrasonic/weight sensors for fill-level detection, methane sensors for odour alerts, and real-time notifications to the City Council via a mobile app
- Integrated solar energy harvesting to power the system and provide additional public amenities (charging ports, lighting) at bus halts
- Designed a biogas recovery pathway for hotels to convert organic waste into reusable methane for cooking or energy generation

Technologies: IoT Sensors, Solar Energy Systems, Mobile App Integration **Team size:** 5

TECHNICAL SKILLS

Programming Languages: Python, Java, C++

Hardware & HDL: VHDL, FPGA (BASYS 3), Digital Circuit Design

Tools & Frameworks: Git, VS Code, React, Vivado

Other Skills: Basic Web Development, Database Management

Office & Productivity: Microsoft Word, Microsoft Excel, PowerPoint (Proficient)

LANGUAGES

- Sinhala – Native fluency
- English – Professional proficiency

INTERESTS & ACHIEVEMENTS

- Served as a School Prefect (2020–2023), demonstrating leadership, responsibility, and organizational skills
- Actively contributed as a Committee Member of the Astronomical Society, participating in collaborative and academic activities
- Strong interest in cybersecurity, web development, and emerging technological domains
- Enthusiastic about problem-solving and continuous learning in computing-related fields
